*microbiome-based solutions
for use in the agricultural industry*

What is the Microbiome?

microbiome noun

 Save Word

mi·cro·bi·ome | \ ,mī-krō-'bī-,ōm  \

Definition of *microbiome*

1 : a community of microorganisms (such as bacteria, fungi, and viruses) that inhabit a particular environment and especially the collection of microorganisms living in or on the human body

// Your body is home to about 100 trillion bacteria and other microbes, collectively known as your *microbiome*.

— Carl Zimmer

Salmonella Dublin is a poster child of a One-Health challenge

Zoonotic Potential

Salmonella Dublin is a poster child of a One-Health challenge

- Responsible for acute invasive disease, marked by nonclassical salmonellosis in calves
- Subclinical carriers contribute to herd endemicity
- Zoonotic potential via animal contact and consumption of contaminated beef or dairy products

Sophia Kenney

Graduate Student

Figure 1. Velasquez-Munoz et al., 2024

Salmonella Dublin is a poster child of a One-Health challenge

Antimicrobial drug resistance in *Salmonella enterica* serotype Dublin and other *Salmonella*, United States, 1996–2013*

Resistance pattern	<i>Salmonella</i> Dublin, no. (%), n = 102	Other <i>Salmonella</i> , no. (%), n = 33,415
Pansusceptible	42 (41)	26,552 (79)
Resistant to <u>>1</u> class	60 (59)	6,863 (21)
Resistant to <u>>3</u> classes	56 (55)	4,013 (12)
Resistant to <u>>5</u> classes	47 (46)	2,374 (7)
Resistant to <u>>7</u> classes	32 (31)	601 (2)
Resistant to at least ACSSuT†	42 (41)	2,156 (6)
Resistant to at least ACSSuTAuCx‡	29 (28)	581 (2)
Resistant to ceftriaxone	32 (31)	947 (3)
Resistant to nalidixic acid	6 (6)	643 (2)
Resistant to nalidixic acid and ceftriaxone	4 (4)	39 (0.1)

*Data from the National Antimicrobial Resistance Monitoring System. $p < 0.01$ for all.

†Resistant to ampicillin, chloramphenicol, streptomycin, sulfamethoxazole/sulfisoxazole, and tetracycline.

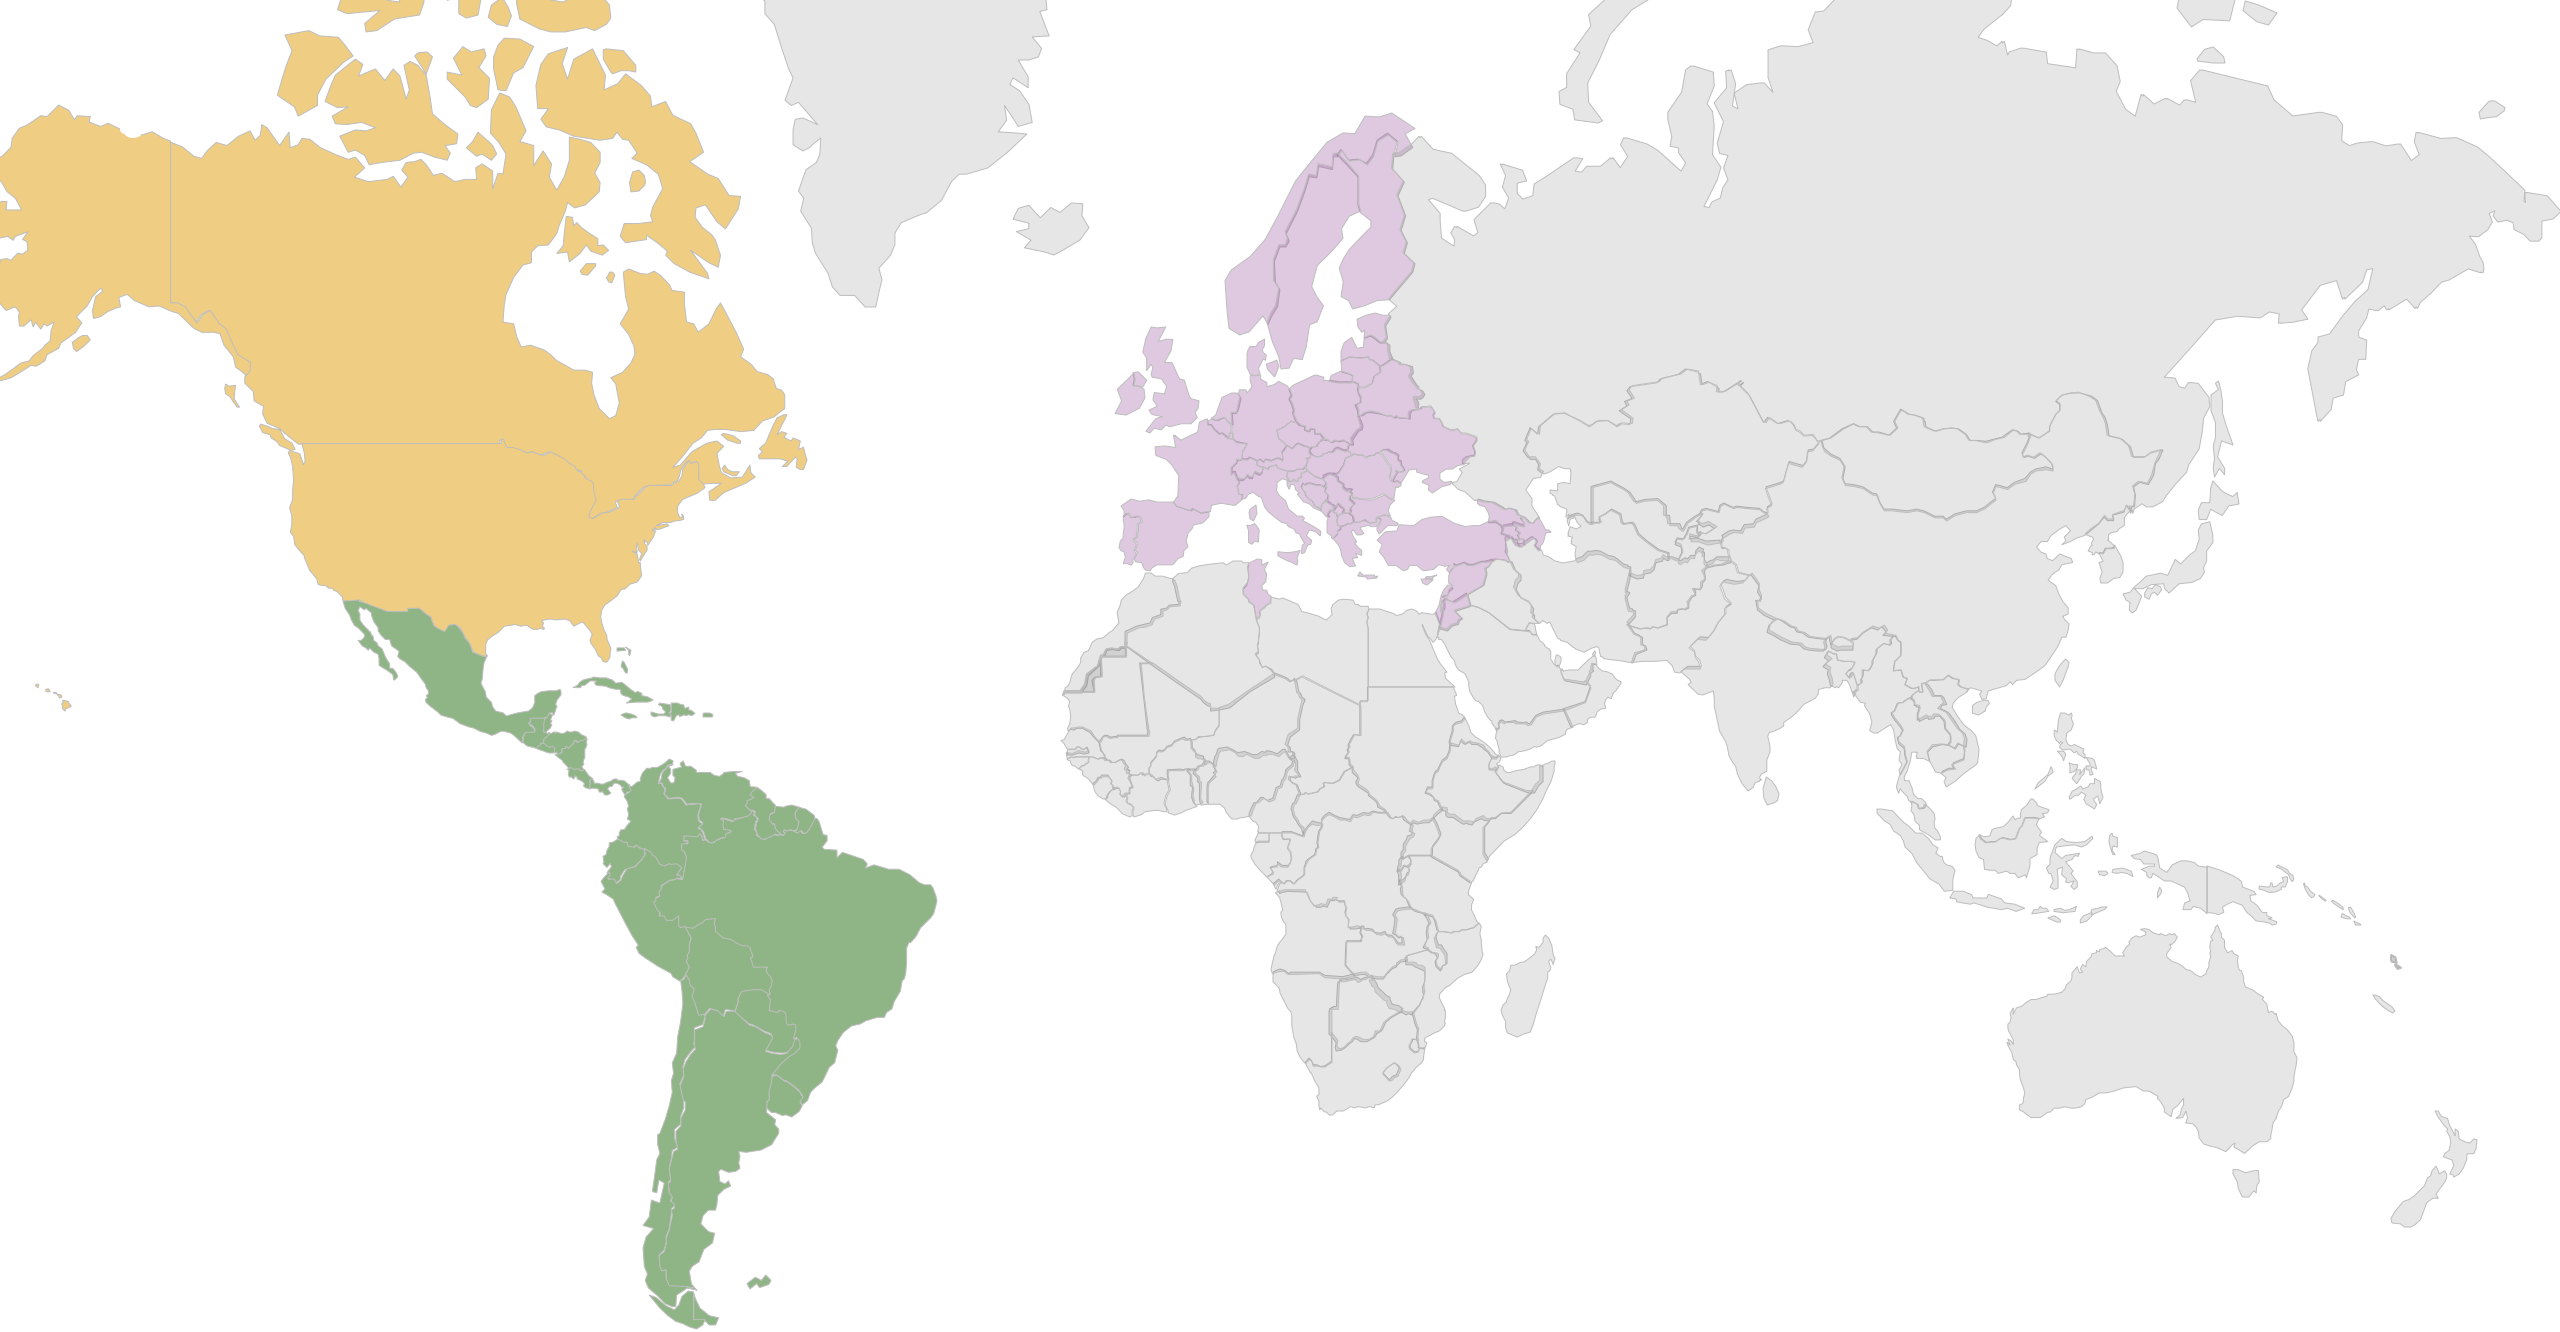

‡Resistant to ACSSuT, amoxicillin–clavulanic acid, and ceftriaxone.

Increasing antimicrobial resistance in *S. Dublin* strains isolated from cattle and humans

PROGRAMA DE PÓS-GRADUAÇÃO EM
CIÊNCIA ANIMAL

VISÃO

Consolidar-se como pós-graduação pública de excelência e referência em Ciência Animal, no contexto do Bioma Cerrado, no âmbito nacional, e internacional, por meio da formação de pessoas sob os pilares do desenvolvimento social, econômico e ambiental, pautados pela geração e transferência de conhecimento científico básico, aplicado e translacional.

VALORES

- Comprometimento
- Cooperação
- Criatividade
- Ética e Integridade
- Humanização e Inclusão
