

PhytoBiomes: A New Vision for Agriculture

Name

Date

Conference & City Country

- Nonprofit, precompetitive research consortium
- Industry, Academia, and Government
- 8 countries
- Coordinating a paradigm shift in agricultural research and production

Phylobiomes: Complex Systems of Plant-based Agriculture

Examples of Phytobiomes

Crop Field

A wide-angle photograph of a vast, golden-brown field of mature grain crops, likely wheat or corn, under a clear blue sky. A yellow combine harvester is visible in the distance on the left side of the field.

Pasture

A photograph of a lush green pasture with several black and white cows grazing. The sky is bright blue with scattered white clouds.

Vegetable Garden

A photograph of a rooftop vegetable garden. Numerous raised beds filled with black plastic mulch and soil are densely packed with various green leafy vegetables. In the background, a cityscape with multi-story buildings is visible under a clear sky.

Forest

A photograph of a forest with many thin, white-barked trees, likely birches, standing closely together. The ground is covered with fallen leaves and some green moss.

Vertical Farm

A photograph of a vertical farm. Multiple levels of white, modular growing racks are stacked vertically, each containing rows of green leafy plants growing in a hydroponic or aeroponic system.

Holy Grail for Phytobiomics

To understand, predict, and control emergent phenotypes within specific phytobiomes for the sustainable production of food, feed, and fiber.

Phytobiomes Alliance Vision

By 2050, all farmers have the ability to use predictive and prescriptive analytics based on geophysical and biological conditions for determining the best combination of plants, management practices, and inputs for a specific site in a given year.

Phylobiomes: Major Research Gaps

Research Priorities

Phyto-biomes-knowledge generation

Standards and protocols & capacity building for application

Regulatory framework

Data generation, management & modeling

Multi-disciplinary capacity building

Precision, digital and AI Ag integration

Major Efforts

Projects that Link Components Within the Entire Phylobiomes Network

Sequence-based Classification System for Microbes

Microbiome Standards – International Microbiome & Multi’omics Standards Alliance

Facilitate Regulatory Compliance

Coordination of Microbial Collections and Networks: Public & Private

Establish Linkages with Human and Animal Health & Nutrition

Lead and coordinate efforts on specific topics

Microbiomes

Regulatory

Animal Microbiomes

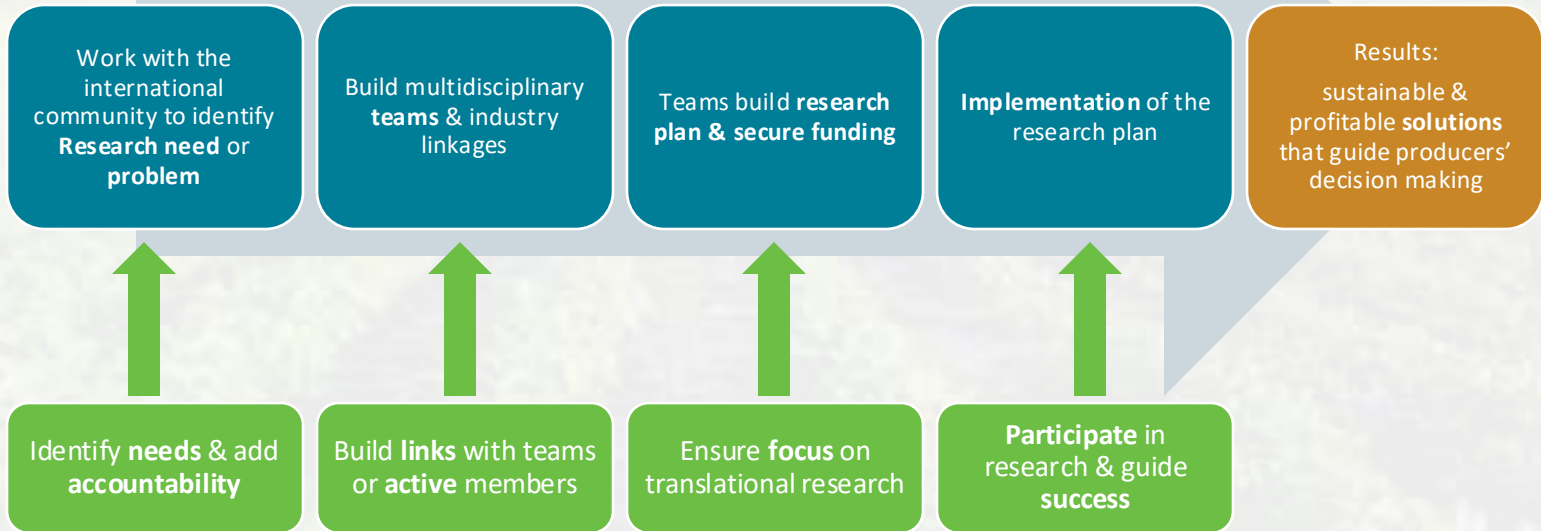

Controlled Environment Agriculture

Soil Health

Translating Research Outcomes into Results

Industry Sponsor Participation

Phytobiomes Alliance Sponsors
